# Honda Cadet GX160 2020 Exhaust with Heat Guard

PRODUCT PART NUMBER: **DEPHC1602**

## Product Information

For Honda Cadet the mandatory permitted exhausts are either the DEP001 (DEPHC1600 - DEP HONDA CADET GX160 Exhaust With Heat Guard) or DEP002 (DEPHC1602 - DEP HONDA CADET GX160 2020 Exhaust With Heat Guard) units only.

Its use should include the DEP-supplied tether secured to the flange mounting stud. When using this exhaust, it is recommended that a captive nut type of fixing be used to secure the exhaust. The use of the additional support bracket and vibration washer is not mandatory but is advised, and non-use of this bracket will invalidate any manufacturer's warranty. No attempt should be made to alter the appearance of the exhaust unit, it must have the same textures and manufacturing marks on it as originally supplied. The flange plate must be a minimum of 4.5mm at all points. The heat shield is an integral part of the exhaust and must be in place at all times. With this exhaust only, sealant may be used with a single gasket, or alternatively two gaskets without sealant.

For Honda Senior, the standard exhaust must be used but a unit modified and sealed by an Agent may also be used. In this case, the unit will bear a seal applied by an Agent and it is the competitor's responsibility to ensure this seal is in place at all times.

At any time the modified unit on the engine can be exchanged with one held by the scrutineer, who will then send the competitor's exhaust back to an Agent for inspection. If this unit is found to have been tampered with in any way, then the competitor will be penalised retrospectively. No other repair or modification is allowed. The heat shield should be in place at all times. Where the original fixings have failed, they can be replaced with a rivet-type thread repair, which can alternatively be welded, in original position.
